

- (d) Appropriate equipment shall be issued to the employee prior to startup or at new-hire orientation by the employer. The employee may be required to provide some PPE.

18.13 Training

OSHA requires the company to provide training to each employee who is required to have PPE and to know:

- (a) when PPE is necessary;
- (b) what PPE is necessary;
- (c) how to properly wear, fit, adjust and remove PPE;
- (d) the limitations of the PPE; and
- (e) the proper care, maintenance, useful life and disposal of the PPE.

If the company has reason to believe the trained worker does not have the understanding and skill required by the company to use the PPE, the company shall remove the worker from the job until the worker is adequately trained.

Each company is required to certify that each worker has been trained or retrained if there is a job assignment change which presents a new hazard, or the need for retraining is identified. Documentation on the date, type of training and worker's name should be retained as documentation.
