 Are disconnects and controllers properly labeled? Does the pit have adequate guards (i.e., counterweight guards, etc.), covers, is dry, and is there safe access and egress? 		
2.3 Pre-startup Safety Survey		
A safety survey should be conducted on all construction, modernization and major repair projects prior to starting work. The responsibility for conducting a pre-startup survey shall be determined by the company. The following is a sample of the items that should be included on a pre-startup checklist. 2.3.1 Asbestos		
☐ Customer has identified all areas containing asbestos		
□ Sampling has been conducted to ensure safe atmosphere□ Precautions have been taken to avoid asbestos containing		
material		
☐ Employees have been properly trained, according to level		
of exposure 2.3.2 Lead Paint		
☐ Customer has identified all areas containing lead paint		
☐ Sampling has been conducted to ensure safe atmosphere		
☐ Precautions have been taken to avoid lead paint		
☐ Employees have been properly trained, depending on level of exposure		
2.3.3 Document Requirements		
☐ EEO, OSHA & State Posters		
☐ Emergency phone numbers identified (i.e. fire, hospital)		
OSHA 300 log available (if required)		
2.3.4 Electrical		
☐ Wiring labeled and grounded		
☐ Adequate power provided in areas where needed		
 ☐ High voltage adequately identified and covered ☐ Ground Fault Circuit Interrupters (GFCI) available 		
☐ Ground Fault Circuit Interrupters (GFCI) available 2.3.5 Fall Protection		
2.J.J I all I TUGULUIT		

☐ Type of fall protection to be used is identified
□ Anchor points identified
☐ Barricades installed properly per handbook (removable)
2.3.6 Fire Prevention
☐ Fire extinguishers available
☐ Wood/paper products or rubbish not in pit or machine room
☐ Smoking/No-smoking areas identified
2.3.7 First Aid
□ Location of first aid station (or kit) identified
☐ Trained personnel identified
2.3.8 General
□ Evaluate the location of work by other trades and
determine impact
2.3.9 Hazard Communication
☐ Chemical inventory list
☐ Containers properly labeled
☐ MSDS's readily available
2.3.10 Hoisting & Rigging
□ Adequate equipment for job
☐ Equipment inspected and certified per manufacturer
recommendations
☐ Capacities identified (equipment and load), ensure
equipment will meet expected lifting requirements
2.3.11 Housekeeping
☐ General condition of work area
☐ Walkways clear
☐ Regular waste disposal schedule
☐ Adequate lighting
2.3.12 Ladders/Stairwells

	Access stairwells have guardrails installed
	Stairwells properly lit
	Serviceable ladders of sufficient height are available
	Extension ladders have safety feet and extend 3 ft (914 mm)
	above landings
	Safe access to work areas provided
2.3	3.13 Material Handling
	Employees are trained to operate forklifts safely and suffi-
	cient equipment is available to move material safely
	(forklifts, dollies, handcarts, etc.)
	Equipment in good working condition
	Staging area for material and equipment identified
2.3	3.14 Scaffolds
	Proper erection is supervised and inspected by Competent
	Person
	Locking pins installed
	Equipped with baseplates
	Tied to the structure when required
	Proper planking
2.3	3.15 Welding
	Adequate equipment provided (if needed)
	Area identified for proper cylinder storage
	Adequate shielding is available (if needed)
	Well ventilated area identified for welding
	Properly inspected extinguisher available
